Whitepaper V1

August 26, 2022

Introducing the freshest BUSD Staking Platform to hit Decentralized Finance in years, **Mango Miner BUSD**, brought to you by the **Mango Finance Team**! This project is being developed by a cross-cultural team of dedicated DeFi enthusiasts that span the globe. They have come together to develop the hottest new staking platform that offers the juiciest ROI's, while mitigating investor's risk using an immutable Smart Contract on the Binance Smart Chain, which will be audited by the most trusted Smart Contract Code Auditors in DeFi. Using some clever solidity code, we have created a **Sustainable Passive Income Generating Staking Protocol** that will earn our investors a sustainable 8% daily Return on Investment (ROI) using our investment bots. Mango Miner income will NOT strictly be generated by our investors. We have a **6 Phase Business Strategy** in place in order to build upon the platform, and to open up further income opportunities for all, while helping the less fortunate along the way.

Mango

Finance

Phase 1 – August 2022: Mango Miner BUSD Launch. 8% Daily ROI BUSD Staking DAPP open to investors.

Phase 2 - September 2022: Initial project profits will be re-invested into an intensive marketing campaign through paid social media ads, Telegram, Moonarch, DappRadar, Youtube Influencers, Bloggers, and affiliates. Also, the team will be expanded by hiring professionals that reside in developing nations. We will also hire a translator to adapt our project(s) to other languages and cultures.

Phase 3 – October 2022: Mango Miner Tropical Themed Roulette Game, 50/50 Coin Flip Game, and Mango Miner Daily Lottery. Profits from these gaming DAPPS will be directly injected into the project TVL (Total Value Locked) via an additional immutable Smart Contract.

Phase 4 – November 2022: At this point we plan to launch the Mango Finance Ecosystem, which will see the launch of Mango Miner BNB, Mango Miner Polygon (MATIC), Mango Miner AVAX, Mango Miner Solana, and more.

Phase 5 – December 2022: December is a month of rest, celebration, family, and of giving. The Mango Finance CEO will donate 25% of the overall profits to charitable causes for at-risk street youth, animal shelters, and rural poverty in an undetermined Latin American country. Proof will be uploaded to social media platforms.

Phase 6 – 2023: 2023 will bring all of the Mango Finance projects together and will introduce a token into our ecosystem, which will further help raise and sustain the TVL for our miner projects. The team will also hold an art competition (with a large BUSD reward) to see who will create the art for our first NFT project in 2023.

Minernomics

Deposit: *2% Marketing Fee, 4% Dev/Owner Fee*

Withdraw: *2% Marketing Fee*

Minimum Investment: *20 BUSD*

Maximum Investment: *25,000 BUSD*

Emergency Withdraw Function - Unlike some other Miner projects in Defi, our smart contract works differently. **The investor gets 50% of their initial deposit back, while the other 50% goes back into the contract to sustain the TVL and to protect investors from others' FOMO.**

As soon as the principal amount has been recovered in daily rewards, the UNSTAKE option will become grayed out, but investors will continue to receive their daily returns as usual while they continue to claim within the 24-hour timeframe.

Minernomics

Fixed 8% Daily ROI: It's a sustainable ROI with high-growth potential offering a Medium Risk - Medium Reward investment. Compared to some other insanely high ROI projects, 8% is more sustainable long term.

The investor Return Cycle: It is based on their initial investment. Any new investments made within the 7-day cycle will be considered in alignment with the first cycle, thus allowing investors to withdraw earlier than 7 days if they choose to make a second investment into the platform.

Reward Claim: It is mandatory to claim rewards using the reward claim button every 24 hours. Once the daily rewards are claimed, then the next reward cycle will begin.

Maximum Profit: In order to maintain a sustainable project, and to avoid Whales potentially draining our project TVL, we have implemented a maximum of 5x profit of your initial investment. For example, If you invest 100 BUSD into the project, your maximum profit will be 500 BUSD.

Quick ROI Math

**We have a built-in ROI Calculator at the bottom of the dapp!*

Days	Principle Investment	Total Investment	8% Daily
1	50 BUSD	50 BUSD	4 BUSD
2	50 BUSD	50 BUSD	4 BUSD
3	50 BUSD	50 BUSD	4 BUSD
4	50 BUSD	50 BUSD	4 BUSD
5	50 BUSD	50 BUSD	4 BUSD
6	50 BUSD	50 BUSD	4 BUSD
7	50 BUSD	50 BUSD	4 BUSD
Total	50 BUSD	50 BUSD	28 BUSD

Days	Principle Investment	Total Investment	8% Daily
1	1000 BUSD	1000 BUSD	80 BUSD
2	1000 BUSD	1000 BUSD	80 BUSD
3	1000 BUSD	1000 BUSD	80 BUSD
4	1000 BUSD	1000 BUSD	80 BUSD
5	1000 BUSD	1000 BUSD	80 BUSD
6	1000 BUSD	1000 BUSD	80 BUSD
7	1000 BUSD	1000 BUSD	80 BUSD
Total	1000 BUSD	1000 BUSD	560 BUSD

Marketing

10% Referral bonus – Referrers will be graciously rewarded 10% of the initial deposit of their referred investors. Unlike some other projects, your referral bonus funds are available to be withdrawn to your wallet immediately. *No investment is required!*

A **HUGE Viral Shiller competition** will be run in our Telegram Group. Any Telegram Group member can participate to shill Mango Miner BUSD in the most unique locations you can imagine. The competition will run for one week and be announced in our Telegram Channel. **All promotional materials will be provided!**

Our Top 5 Shillers will each receive \$50 BUSD, our #1 Shiller will receive a total of \$100 BUSD, with the chance to become our future marketing director!

Security & Audit

As of August 26, 2022, our custom-coded Binance Smart Chain Smart Contract has been deployed and verified on BSCscan. Due to a huge backlog of other projects in the pipeline, we are waiting to have our Security Audit completed by the legendary George Stamp. You are, however, able to see our full solidity Smart Contract at our contract address, and you can take a look for yourself that we have a secure project.

Smart Contract has been renounced and is immutable and unmodifiable by us. The project will forever run on the Binance Smart Chain, and there is nothing our team can do to modify the contract in any way. In case our Front-End website is ever down, you are able to fully interact with the contract using the Write Function BSCscan.
